DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 18 August 2006 has been entered.

Election/Restrictions

2. This application is in condition for allowance except for the presence of claims 11-13 directed to Inventions II-VII non-elected without traverse. Accordingly, claims 11-13 have been cancelled.

3. Claim 1 is allowable. The restriction requirement among Inventions I-VII, as set forth in the Office action mailed on 18 May 2005, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claim 5, 6, 7, 9 and 10, directed to Inventions II-V are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present

application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 11-13.

Allowable Subject Matter

5. Claims 1-10, 14 and 15 are allowed.

6. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable for at least the reason "when the focused position of a first observation point stored in the focused position storage device is shifted from the first observation point to a second observation point, along an X-Y plane perpendicular to the Z-axis, the focused position detection device sets the search range for the second observation point based on the stored focused position of the first observation point" as

set forth in the claimed combination. Claims 5, 6, 7, 9 and 10 are also allowable based upon their dependence on claim 1.

Claim 14 is allowable for at least the reason "wherein when the focused position of a first observation point stored in the focused position storage device is shifted from the first observation point to a second observation point, along an X-Y plane perpendicular to the Z-axis, a focused position detection device sets the search range for the second observation point based on the stored focused position of the first observation point" as set forth in the claimed combination.

The prior art of record teaches a microscope system comprising a stage, an image forming optical system, an image capturing device, a focused position detection device, a focused position storage device and a focused position detection device wherein the focused position detection device sets a search range centered around the focused position stored in memory at the focused position storage device and detects the focused position anew by causing the stage and the image forming optical system to move relative to each other over the search range thus set each time a focusing operation is executed. However, the prior art of record does not teach when the focused position of a first observation point stored in the focused position storage device is shifted from the first observation point to a second observation point, along an X-Y plane perpendicular to the Z-axis, the focused position detection device sets the search range for the second observation point based on the stored focused position of the first observation point and there is no motivation or teaching to modify this difference as derived.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
